

Clinical Lipidology

About Clinical Lipidology

Lipid related illnesses are set to impose a huge burden on healthcare in the coming years, with lipids playing an important role in many areas of research. **Clinical Lipidology** (formerly *Future Lipidology*) reports on the major advances in lipidology research and assists the health community in meeting these challenges.

The journal covers:

- The genetics and molecular biology of lipid disorders and metabolism
- Obesity and the metabolic syndrome
- Therapeutic overviews of optimal treatment strategies and future trends
- Related cardiovascular diseases, such as atherosclerosis
- Results of recent clinical trials relevant to the field of lipidology

Readership & Demographics

Clinical Lipidology is available by individual and institutional subscription. The journal has a worldwide circulation of 450 and due to our extensive global e-license and academic access programme, it has an estimated readership of approximately 13,500.

Primary audience:
Cardiologists, Lipidologists, Hematologists, Clinicians, Research Clinicians, Scientists

Secondary audience:
Pharmaceutical, Policy & Decision Makers, Healthcare, Regulatory
