Future Cardiology

About Future Cardiology

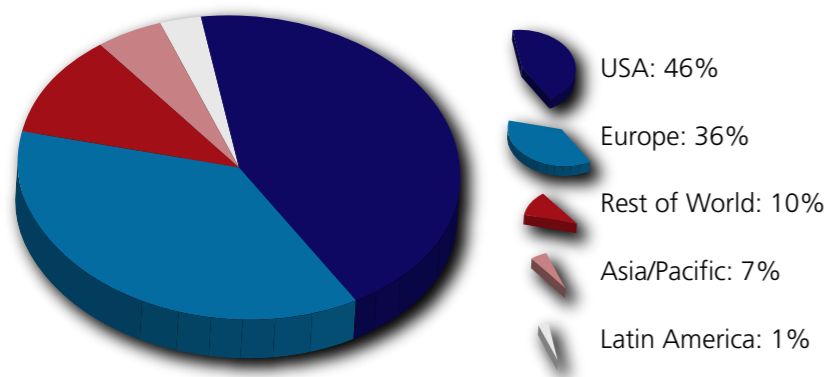

Research advances have contributed to improved outcomes across all medical specialities but the rate of advancement in cardiology has been exceptional. Exciting developments in interventional cardiology, such as improved electrical and mechanical devices, cell therapy and xenotransplantation, are already delivering real benefits.

The journal covers:

- Molecular basis of cardiovascular disease
- Therapeutic overviews highlighting optimal therapy and future options
- Interventional, surgical and psychosocial aspects of cardiovascular disease
- Pharmacoeconomic and outcomes issues in cardiology

Readership & Demographics

Future Cardiology is available by individual and institutional subscription. The journal has a worldwide circulation of 580 and due to our extensive global e-license and academic access programme, it has an estimated readership of approximately 17,400.

Primary audience:
Cardiologists, Lipidologists, Hematologists, Clinicians, Research Clinicians, Scientists
