

Future Microbiology

About Future Microbiology

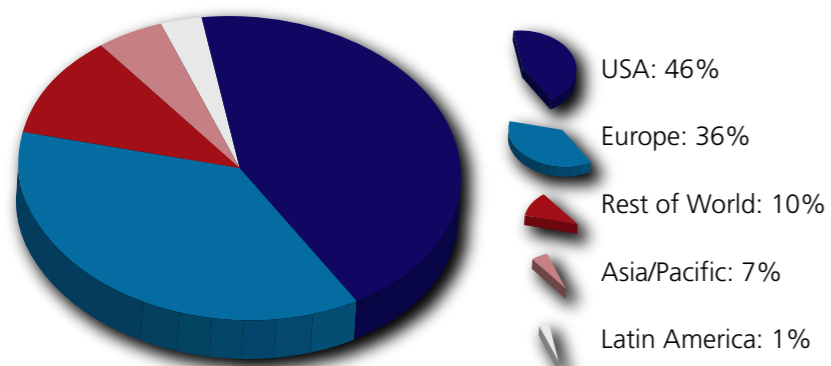

Future Microbiology provides an interdisciplinary forum for all scientists working in the field today, bringing together the diverse subject areas of bacteriology, mycology, parasitology and virology.

The journal covers:

- The molecular basis of microbial diseases and microbe-host interactions
- Overviews highlighting optimal therapeutic and diagnostic approaches
- The use of microbes in the treatment of disease and genetic engineering
- Summaries evaluating newly approved antimicrobial agents
- Pharmacoeconomics and cost-benefit issues in microbiology
- New and re-emerging microbes impacting human health
- Microbial genome research and the implications to higher organisms

Readership & Demographics

Future Microbiology is available by individual and institutional subscription. The journal has a worldwide circulation of 990 and due to our extensive global e-license and academic access programme, it has an estimated readership of approximately 10,500.

Primary audience:
Clinicians specializing in infectious diseases, Microbiologists, Bacteriologists, Immunologists, Mycologists, Parasitologists, Virologists, Research Clinicians

Secondary audience:
Pharmaceutical, Policy & Decision Makers, Healthcare, Regulatory

ISSN: 1746-0913
 Published: 12 per year
 Volume: 5 (2010)
 Citations: MEDLINE/Index Medicus, EMBASE/Excerpta Medica, Chemical Abstracts, CAPCAS, EMBiology, BIOSIS Previews, Science Citation Index Expanded (SciSearch), Biotechnology Citation Index, Journal Citation Reports/Science Edition, Scopus

“ **Future Microbiology** promises to provide a cutting edge perspective on the novel concepts and technological opportunities in the fight against microbial diseases in the post-genomic era. ”

SH Kaufmann, Max-Planck-Institute for Infection Biology, Germany
