

# Future Neurology

## About Future Neurology

Future Neurology provides authoritative commentary and analysis to address the important challenges and advances facing neurology and neuropsychiatry today.

### The journal covers:

- Advanced computer and software systems for modeling and directing therapy
- Adverse events and drug safety
- Biological processes involved in neurological dysfunction
- Clinical implications and applications for new biomarkers
- Genetic contributions to neurological disorders, such as epilepsy and autism
- Impact of molecular genetics on prevention, screening, diagnosis & treatment
- Pharmacoeconomics and cost-benefit issues in neurology
- Potential applications of stem cells & gene therapy in neurodegenerative diseases
- Selective and 'personalized' approaches

## Readership & Demographics

Future Neurology is available by individual and institutional subscription. The journal has a worldwide circulation of 990 and due to our extensive global e-license and academic access programme, it has an estimated readership of approximately 10,500.

Primary audience:  
Cardiologists, Lipidologists, Hematologists, Clinicians, Research Clinicians, Scientists

Secondary audience:  
Pharmaceutical, Policy & Decision Makers, Healthcare, Regulatory

ISSN: 1479-6708  
Published: 6 per year  
Volume: 5 (2010)  
Citations: EMBASE/Excerpta Medica, Chemical Abstracts, Scopus

“Future Neurology represents a unique and important source of timely, informative reviews of both molecular pathogenesis and neuropharmacology. This combination will facilitate the translation of laboratory advances into practical therapies.”  
Sam Gandy, Thomas Jefferson University, USA
