

Regenerative Medicine

About Regenerative Medicine

Regenerative Medicine is the award winning forum for a fast growing community of specialists to address the important challenges and advances that are now occurring in stem cell research and regenerative medicine. It delivers this essential information in concise, clear and attractive article formats – vital for an increasingly time-constrained community.

The journal covers:

- Derivation and maintenance of stem cell lineages
- Potential applications for stem cell-based strategies in pathological conditions
- Stem cell clonality and emerging technologies
- Tissue engineering and characterization of engineered tissues
- Medical device and artificial organ development
- Drug development and stem cells
- Regulatory issues concerning the derivation of stem cells

Readership & Demographics

Regenerative Medicine is available by individual and institutional subscription. The journal has a worldwide circulation of 600 and due to our extensive global e-license and academic access programme, it has an estimated readership of approximately 7,200.

Primary audience:
Cardiologists, Lipidologists, Hematologists, Clinicians, Research Clinicians, Scientists

Secondary audience:
Pharmaceutical, Policy & Decision Makers, Healthcare, Regulatory

ISSN: 1746-0751
